### DETAILED ACTION

1. The final rejection of 9/18/2003 has been withdrawn. Further action on the merits appears below.

#### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Davitt et al (4,419,154) in view of Taylor et al(3,291,664).

Davitt et al discloses a delay composition comprising 15-60 % barium sulfate, 25-75 % red lead and 5-40 % of silicon. Davitt further states that the inclusion of red lead speeds up the burning time of the composition.

Taylor et al teaches the use of up to 5 % sodium carboxymethyl cellulose with a delay composition.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use less red lead to result in a lower burning rate. Since Davitt teaches that the inclusion of red lead would speed up the burning rate, it would conversely decrease if less red lead were used. It would have been obvious to use the binder as taught by Taylor with the delay composition of Davitt since Taylor suggests that the binder is useful in delay compositions. The surface area and particle size are inherent properties of the delay composition. It would also be obvious to vary the

amounts of the ingredients to optimize the performance of the delay composition. It is well-settled that optimizing a result effective variable is well within the expected ability of a person of ordinary skill in the subject art. In re Boesch, 617 F.2d 272, 205 USPQ 215 (CCPA 1980), In re Aller, 220 F.2d 454, 105 USPQ 233 (CCPA 1955).
